Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

Status of Claims

1. Claims 35 and 37 have been examined.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

3. Claims 35 and 37 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 35 recites performing the steps of "sending", "receiving", deducting" and "activating", "if sufficient funds are present". However, the Applicant has not provided one of ordinary skill how the Applicant's method is to perform if there the register lacks sufficient funds. Conditional statements necessarily embody two possibilities ("if" and "if not"), therefore, Applicant's method is broad enough to read on a method where the register lacks "sufficient" funds and the steps of "sending", "receiving", deducting" and "activating" do not take place.

Claim 37 is also rejected as it depends from claim 35.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 35 and 37 are rejected under 35 U.S.C. 103(a) as being unpatentable over Fisher, U.S. Patent No. 5,005,200 in view of Taylor, U.S. Patent No. 5,530,232.

As per claims 35 and 37, Fisher teaches a method for obtaining a cryptographic certificate comprising: receiving at a device, such as the device of party A (column 9, lines 20-34), a request for a cryptographic certificate (column 3, lines 53-68; column 6, lines 36-65; column 18, lines 32-68). However, Fisher does not explicitly recite a metering device including a register having funds stored therein. Taylor teaches metering device including a register having funds stored therein. Specifically, Taylor teaches a data card (column 6, lines 44-49) connected to a personal computer (column 6, lines 55-68) for making electronic purchases via modem (column 6, lines 63-67). One of ordinary skill in light of the teachings of Taylor would before making a purchase determine if the smart cash card (column 6, lines 44-49) had sufficient value in order to perform an electronic transaction (column 6, lines 56-64) such as an electronic purchase. Further,

implementing a postage meter in a personal computer ('200, column 9, lines 20-34; '232, column 6, lines 55-58) is old and well known. Therefore, it would have been obvious to combine the teachings of Fisher and Taylor in order to allow a user to protect user financial information while making a purchase over an insecure network

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure:
 - Graves et al. teach a remotely rechargeable poster meter embedded in a computer
 - Force et al. teach a smart card connected to a PC for conducting debit transactions
